Hello Cruisers!

It looks like a great year ahead for the Hot Rod & old car hobby. As I write this, I reflect on some of the reasons the hobby is so strong. It goes on year after year with no sign of slowing down. As I think about this I realize that the hobby is actually a history lesson. Each car is special in it's own way. Each owner is sharing their knowledge of automotive history pertaining to the car they show & enjoy. Each car has it's own era. From the Model T to the latest muscle cars such as the Hellcat & the Super Snake. We are actually preserving this history by sharing our automotive knowledge in the form of car shows. We now stand on the edge of a new era in Automotive history. Namely, the electric car. There is no doubt that the electrics are coming. It won't be long before some backyard mechanic will figure out how to improve on Detroit's ideas. This is a movement that isn't going away. The one thing that I know for sure is electric cars are never going to replace the deep rumble of high performance exhaust cruising through the Drive-in parking lot on a warm summer evening. Enough said...

We do know that the old car hobby is more than just cars and parts. The fellowship is indeed unique. I am sure that other hobbies have a fellowship as well. Susan & I have met so many wonderful people through this fellowship. We have formed friendships that have lasted for years. Sadly, we have lost some people through illness and death. On the positive side we meet new friends every week throughout the show season. We truly have been blessed. We just hope that we have been able to give something back through our efforts. On behalf of all of us here at 3-D, we hope that all of you out there have an enjoyable and prosperous season !! Cruise On !!!

David & Susan Palmer
